ABOUT GSMS

Founded in 1986 by a U.S. Veteran, GSMS, Incorporated serves the federal government by providing high-quality, competitively priced, generic pharmaceuticals with a variety of size and label options.

MISSION

To improve health and quality of care by providing a wide portfolio of generic pharmaceutical products to our customers and the patients they serve.

OUR COMMITMENT

GSMS is dedicated to ensuring the integrity of not only our products, but also the integrity of the pharmaceutical supply chain. We have the capabilities to meet the safety, packaging, labeling, pedigree, and distribution needs of our customers and the patients they serve. Our commitment to excellence and integrity has brought us to the forefront of electronic pedigree systems to safeguard against counterfeit drugs.

OUR FACILITIES AND EQUIPMENT

GSMS offers flexible packaging capabilities and reliable order fulfillment in a 24 hour/5 day a week operation. Our packaging and distribution facilities occupy over 85,000 square feet and are FDA and DEA compliant and VAWD accredited.

The Camarillo, CA facility houses eleven production suites which contain enhanced security monitoring, HEPA filtration systems and temperature and humidity controls. Our state-of-the-art packaging and labeling equipment are designed to meet a variety of customer requirements from unit of use packaging to multiple other custom quantity needs. Additionally, all production lines contain serialization and aggregation capabilities that are compliant with the FDA's Drug Supply Chain and Security Act (DSCSA) requirements.

In February 2020, GSMS acquired an additional 70,000 square feet of multi-use space on the same campus that will be utilized for future growth.

OUR LABEL

COLORMAP

Our labels utilize a ColorMap which is a sequence of colors established by GSMS to alert the prescriber of the strength of the product.

SAFETY LABEL

Our unique pharmacist- and patient-friendly label provides pertinent information in a simple, color-coded format to minimize dispensing errors.
